

Press Release**Chief Executive Officer commits a mistake!**

The Chief Executive Officer of John Kerry's government, Dr. Abdullah during the Council of Ministers said that: "Hizb ut Tahrir is one of the noncombatant branches of Terrorist Groups which encourages people and young generations in Afghanistan towards terrorist acts." He also emphasized that Hizb ut Tahrir is not a political party, but an organization related to terrorist organizations. Moreover, "No special attention has been carried out to ban the acts of this party by the government of Afghanistan."

Hizb ut Tahrir's acts have explicitly agitated the puppet government of John Kerry this is why the government has described as it a terrorist group right at the time that tens and hundreds of Muslims are brutally killed by Western and Regional Intelligence Agencies; while the government remains silent against such ruthless crimes! However, in most cases the Afghan government is directly involved in such atrocities. Although, Abdullah does not consider such Muslim genocides terrorist acts! This question must go to the CEO, what is his obvious definition about terrorism and terrorist groups? Terror is a phenomenon which has been brought from the West through dirty and frowzy politics which has thrashed the cohorts and supporters of CEO within 14 years, as its prominent example is the cryptic murdering of Jihadi leaders, and it is not improbable that someday he himself would be a victim of such policy. Undoubtedly the CEO, along with his policy, has been carrying out the policy of west against Muslims in Afghanistan. He has assuredly forgotten that it was the West which scandalized him shamefully during the deadlock of his Presidential Election.

These speeches of the CEO represent his shallowness and unawareness regarding the facts of global policies because he has not offered any small document and proof to verify his claim about Hizb ut Tahrir and verily he has framed this outburst to divert the public opinion. However, Hizb ut Tahrir has been accomplishing its intellectual and political struggle in accordance with Prophet Mohammad's (saw) Sunnah for more than half a century and has not resorted to physical acts ever.
