Planted Bomb or Suicidal; Both are the Result Continued Occupation & Colonialism!

(Translated)

The Media Office of Hizb ut Tahrir in Wilayah Afghanistan condemns in the strongest words possible the vicious act of spilling the blood of our Hazara brothers and asks Allah (swt) for the forgiveness for the dead, speedy recovery for the injured and patience for the families of the deceased and injured.

Indeed, this tragic incident once again proved that the John Kerry made government that came as a result of shameful compromise can't even protect people in the very capital of Afghanistan but could deploy maximum security for their own protection.

Ironically, soon after the explosions, the media wings of the Western embassies started calling it an attack on "democracy" and "people's rule", but what they conceal from the people is the continuation of the occupation, the presence of the brutal occupying forces, intelligence networks and private security companies who act as mercenaries that came with this so-called "democracy" to Afghanistan. Hence, they always hide behind fancy phrases like "people's rule" when in fact it is a false pretext to justify and prolong the fierce occupation of the US and NATO forces. In addition, by undertaking such heinous acts of killing innocent human beings they lay the groundwork for further prejudices on ethnic, language and sectarian lines among the Muslims of Afghanistan.

In addition, the media wings of the embassies as well as the corrupt ruling elite immediately also called the explosions a "suicide attack", while according to the people present on the scene, the explosion resulted from the bombs already planted and were not a suicidal attack. It is also worth mentioning that by looking at the complication of the incident one can't help but think that only the occupying forces and its intelligence agencies have the expertise of planning and executing such a horrific attack.

Lastly, Hizb ut Tahrir would like to address 'Junbish-e-Roshnai' and remind them that in the presence of the occupying colonial invaders there is and would always be a possibility of turning 'Junbish-e-Roshnai' to 'Junbish-e-Tareki'. This is because the occupational forces, their intelligence agencies and the agencies of the regional governments as well as their rental killers could plant bombs anytime to incite ethnic, linguistic, sectarian and political rift among the Muslims of Afghanistan, who are only brothers.
