

Press Release

Decisions of the National Council ... Blowing in Ash and an Attempt to Reproduce the Political Failure!

(Translated)

A four-day meeting of the Palestinian National Council was held in Ramallah, and as expected, its final statement was only an affirmation of the path of wasting Palestine and adherence to UN resolutions that confer legitimacy on the Jewish entity, and an attempt to revive the Palestinian Liberation Organization (PLO) after its bones have worn out, and seeking to find justifications for the continuity of the organization and its authority in the so-called political process and peaceful approach.

In response to the convening of the Council and its final statement, we mention the following:

- The convening of the Council at its ordinary session after 22 years confirms the fact that the role of the PLO has ended, and its validity is over. Therefore, the competition for it or the attempt to reform it is like blowing in ash and an attempt to revive an organization whose aim was to waste Palestine and to legislate the existence of the Jewish entity. And the origin is to declare disassociation from it and from its squandering approach.

- The Council's rejection of Trump's decision was not out of keenness for Al-Quds (Jerusalem) or for the sake of the Masra of the Messenger of Allah (saw), but it is within the context of the rivalry between the colonial projects. Trump's deal and his "innovative" solutions; and the two-state solution, between American exclusivity and European countries' quest for a share in shaping the region including the issue of Palestine. And whoever believes that the chorus of the organization is keen on the rest of Palestine is living illusion or blindness. There is no discrimination in land that Allah has blessed around Al-Aqsa Mosque. So, there is no difference between Safad and Asqalan or between Nablus and Ramallah; all of which are Islamic lands that were irrigated with the blood of the great companions, may Allah be pleased with them, and whoever trivializes the occupied territories in 1948 will certainly trivialize the territories occupied in 1967, for nothing hurts the dead!

- The continued call to provide international protection to the people of Palestine is an insistence to subjugate Palestine and its people to a multi-national occupation, which is to bring about more calamities and disasters that are deployed by international forces wherever they go. So, instead of calling for

mobilizing the armies to liberate the whole of Palestine, the organization persists in keeping it hostage to the Kaffir colonists.

- The decisions of the Central Council, which recommended severing the relationship with the Jewish entity and the cessation of security coordination with it, have faded and did not find a way to implement, for all the recommendations of the National Council in this direction are pure nonsense. And then how an authority whose President is "Lieberman" and its Prime Minister is "Mordechai," as Erekat said, would fight the Jewish entity, threaten its security or existence or stop providing security protection for it?! It is not for this the Organization was found, and it is not for this the Palestinian Authority was created!

- The Palestinian Authority was established by an international resolution, and it is not the product of struggle and contention as it is marketed; therefore, the Authority does not have power over itself. Thus, the National Assembly's call to consider its commitment to the agreements signed with the Jewish entity is an inappropriate call, for it is a minor's call in addition to its being a shy call!

- Affirming the political approach of the Organization through adherence to peaceful solutions and calling for an international conference on the basis of the resolutions of the United Nations is a continuation of treason and an attempt to reproduce the political failure and the continuation of the disasters brought by this submissive approach to Palestine and its people.

- Incidents and facts confirm day after another that the solution to the issue of Palestine is merely to liberate it, and that all the means adopted by the Organization, its Authority and the gang of Muslim rulers will bring nothing but destruction to Palestine, its people and its holy places. The people of Palestine should disassociate themselves from these and from their decisions, summits and councils and raise their voice calling the armies of the Ummah to move to support their Deen and the Masra of their Prophet (saw), so they foil Trump's deal, end the two-state solution, uproot the Jewish entity and restore Palestine as the pearl of the crown for the Muslim countries.
