We in the Women's Section of the Media Office of Hizb ut Tahrir / Wilayah of Sudan show the following facts:

First: The idea of human rights is a purely Western idea, as the United Nations General Assembly adopted the Charter of the United Nations and the Universal Declaration of Human Rights, which they consider the basis for what is known as human rights. Since then, the United Nations has expanded human rights law to include specific standards for women, children and persons with disabilities, small ethnicities and vulnerable groups. So, human rights are specific criteria according to the Western capitalist viewpoint with its belief in separating religion from life, and is an expression of the capitalists' view of the individual and society and is imposed on women and children. As for the rest of the groups, it mentioned them as a matter of throwing ashes in the eyes. Western countries have chosen human rights as a glittery slogan that takes its magic at the heart of many unconscious women, due to the injustice and oppression inflicted upon them by the absence of equitable Islamic systems. The West raised the slogan "protecting women and children and protecting freedoms" but in its own way and according to its view of life, which contradicts the system accepted by Islam; the religion of the people of Sudan.

Second: What proves the falsity of these human rights, is how many times has this organization that claims to defend human rights come together and decided and announced in vain to dilute fateful issues in which humans, especially Muslims, are massacred in cold blood, as happened in the massacre of the General Command, and in various Muslim countries, blood was shed and hundreds of thousands wounded and detainees and millions of displaced and migrant persons, which pays lip service to human rights, without the West moving a finger, and this is not surprising, because those who are killed and suffer are Muslims, and because the killer is a servant of the West, a preserver of its interests and a fighter for the religion of Allah Almighty and for those who want to restore and judge by Allah's law, Glory be to Him.

Politicians pay lip service to the maintenance of human rights, and they are the ones who trampled on human rights, which is blazing with the burning fire of capitalism and its oppression. Despite the richness of this country, many of its people, those who did not die in the conflicts that the West and its cronies ignite, die of starvation and poverty at a time when a handful of capitalists and client politicians are enjoying the country's capabilities and wealth, all because of the injustice of the capitalist system and the greed of its people.

Third: Certainly, human rights is an outright lie, a glittery slogan, and a loose term used by the politicians who put their hands in the hands of the Ummah's enemy, the capitalist West, welcoming those who use human rights as a pretext to interfere in the country's affairs, plunder wealth and enslave its people, a term promoted by misleading and politicized media channels that falsify facts and make the view of women according to the point of view of Sharia is an attack on their rights, as a blow to the position of the Muslim woman in society, so that she becomes like the immoral women of the West because of freedoms.

Finally, the inevitability of restoring the Khilafah Rashidah (Rightly-Guided Caliphate) upon the method of the Prophethood has become an urgent matter to rid the world of the evils of capitalism, remove injustice, and restore rights to its people. Thus the earth will be filled with justice after it was filled with injustice.
