

Press Release

**Despite the Cunning of Western Circles and the Farce of the Legislative Elections, the Ummah's Revolution Continues to Establish the Islamic Khilafah (Caliphate)**

(Translated)

The twelfth anniversary of the launch of the Ummah's revolution falls upon us on the 17th of this December. The colonial kufr (disbelieving) West and its agents in power are working by all means and methods to break the will of the people, suppress their revolutionary ego, and eliminate any attempt for radical change on the basis of Islam, especially when Islam and the Khilafah (Caliphate) became a public opinion sweeping the Islamic countries, including Tunisia.

The Kufr West has tried to divert the revolution from its course since the first day of its launch, because of the great danger it posed to its influence in the region. The outcomes of the G8 Deauville Summit in France in May 2011 required tying Tunisia to international agreements, drowning it in foreign debts, and mapping its future according to its point of view in life through a man-made constitution that excludes Islam from ruling and preserves its interests, and as a result controlling the political scene, bringing its men of choice to power. Despite all that cunning, the West and its cheap tools did not succeed in extinguishing the flame of the revolution. The July 25, 2021 movement occurred in order to save the crumbling secular system by replacing one agent with another and changing the secular 2014 constitution with another secular constitution, thus ensuring that the country remains under its control in planning, legislation and implementation after it distances it from its religion, system and rulings.

**Our People in Tunisia:** The farce of the legislative elections, in addition to being a crime that opposes Allah in legislation and president Kais Saied's choice to hold it on the anniversary of the launch of the Ummah's revolution is another chapter of the conspiracy to close the file of the revolution once and for all and install the secular system, the cause of misery and despair. In addition, it is a response from him to the Western powers to get out of the state of exception by establishing a new parliament, which enables him to preserve the interests of the west and move forward in implementing the commitments of the President's government to the International Monetary Fund. What is truly hopeful is that the Ummah has become aware that these elections are a tool to stabilize the system and that it only brings agents for the Western circles. The people's boycott of the referendum on the constitution and their reluctance to participate in the upcoming legislative elections represent a strong slap to colonialism and its lackeys.

**Our People in Tunisia:** Today, radical change has become something that imposes itself on us, and there is no alternative or option other than serious work to change the reality that all people testified to as corrupt. Today, the revolution is at a crossroads and is passing through a difficult test because there are those who want to end and liquidate it by extinguishing its flames and quelling its movement so that it does not rise, and in return there are those who work to preserve its idea, stoke its roots and correct its course according to a strategic view and vision based on a political project, Khilafah Rashidah (rightly-guided Caliphate) on the method of the Prophethood. And we in Hizb ut Tahrir / Wilayah Tunisia call upon our people in Tunisia to complete their revolution with Islam, and to take into consideration the civilized alternative that we offer them, which is based on the great Islam, as the only alternative capable of extricating the Ummah from its impasses and achieving the goals and constants of the revolution, in overthrowing the regime in all its forms, pillars, and symbols and work on establishing the rational rule on the basis of Islam, which Allah has commanded us to implement, under the shade of the Khilafah State on the method of the Prophethood, which sets the scales with justice as commanded by Allah (swt). **“They are those who, if established in the land by Us, would perform prayer, pay alms-tax, encourage what is good, and forbid what is evil. And with Allah rests the outcome of all affairs.”** [Al-Hajj 22:41]
