## **Aden Youth are Fuel for International Conflict in Light of the Loose Security, and the Criminal ISIS**

(Translated)

The police of Aden province announced on Monday that 50 people were killed, while 120 others wounded in a suicide attack that targeted new recruits in the city, which was adopted by the so-called ISIS as reported by news sites. Police described in a statement that the treacherous attack was a car bomb driven by a suicide bomber targeting a recruiting center in the Sheikh Othman district in north of Aden.

As we offer our condolences to the families of the killed in this sinful terrorist act, asking Allah to have mercy on them and heal the wounded and the injured, we at the same time hold the security authorities in Aden responsible for those criminal acts that suggest failure after failure to preserve the lives of our people in Aden. Where youth are invited to recruitment within the Anglo-American agendas that serve international conflict on Yemen, particularly on the South that is burnt by the fire of separatism and regionalism which create the conditions for the emergence of criminal organizations that operate according to agendas that serve the foreigner and shake the red rag for him.

From the city of Aden, the Anglo-American conflict has made a hotbed of chaos, assassinations and bombings and a paper for swaps and controversies, especially with the differences and disparities between those responsible for its management and the supporters, each according to his loyalty to one of the parties of the criminal Anglo-American international conflict. That is not only in the city of Aden but the chaos has spread to the remainder of the land where the infrastructure has been demolished, the basic services are lacking, gangs have spread, the economy has contracted, the people are being fought in respect to their foodstuffs and wages, and unemployment has spread so that the young men of the people of Yemen have become the cheapest fuel for that international criminal struggle that draws them in to become tools to accomplish their interests.

Islam has strongly forbidden these criminal acts, so how can an organization that claims Islam undertake them?!! Has the killing of Muslims become jihad and an act of worship by organizations that are not known, their heads from their toes, except through statements and images that are likely to be hacked by intelligence related to a side in favor of this or that party?!

The Ummah has been plagued in the absence of Khilafah by the emergence of organizations and groups that have been established as a reaction to the bitter reality without a conscious study of the correct change and how to restore the authority of Islam. So they were dominated by Takfir and revenge for what the rulers committed on their right of crimes. Instead of directing its arrows towards the foreigner, who they were established to perform Jihad against him as they claim, they direct their arrows to the chests of the sons of the Ummah and became a destructive element in the nation and are a huge asset for the foreigner, who part of his program to weaken the Muslims was to see Muslims fighting each other, and he attained what he wanted at the hands of these people. We invite them to review their actions and what they committed of the crimes against Islam and the Ummah.

The real solution to removing these organizations that kill Muslims and draw knives across their throats is to remove the reasons that were the cause of their existence. They claim that they are working to establish the law of Allah, the establishment of the Khilafah (Caliphate), the removal of the hands of the Kaffir foreigner from Muslim lands and the removal of the agent rulers, but they violated the method of the Holy Prophet (saw) for change and achieving the aim, confused the concepts, missed the necessity to comply with the Hukm Shari', rushed the result and their dispositions were filled with motivated revenge despite the sincerity of many of its sons, but without true awareness. Thus, they abused Islam and killed its sons, while the Kaffir colonizers and their agents of the rulers were unharmed by them. Rather they became a ride for the foreigner and its agents; knowingly or unknowingly, for the result is clearly obvious.

And that the real solution is through the hard, effective, aware and sincere work for the establishment of the Islamic state, the Khilafah State (Caliphate) on the method of the Prophethood, following the method of the Honorable Prophet, prayers and peace of Allah be upon, which requires spreading awareness in the Ummah and not to collide with it except through intellectual and political struggle, and requesting victory (Nusrah) from the people of power in the Ummah to establish a rule on the basis of Islam. And so is what Hizb ut Tahrir working for and is committed to in its march towards this high goal. It is to this that we invite you, O our people in Aden and throughout Yemen, for by it alone is the salvation, and other than this will only make you as the one seeking refuge from heat into fire...

*Hasbuna Allahu wa Ni'ma Al-Wakil* (Allah (Alone) is sufficient for us, and He is the Best Disposer of affairs for us)...
